

Known/Questioned Comparison

```
graph TD; A[Known/Questioned Comparison] --> B[Identification]; A --> C[Inconclusive]; A --> D[Elimination]; B --> B1[Same Source]; B --> B2[Different Source]; C --> C1[Same Source]; C --> C2[Different Source]; D --> D1[Same Source]; D --> D2[Different Source];
```

The diagram illustrates the process of Known/Questioned Comparison, which branches into three main outcomes: Identification, Inconclusive, and Elimination. These outcomes are categorized under 'Examiner Decision'. Each outcome further branches into 'Same Source' and 'Different Source' conclusions, which are categorized under 'Ground Truth'.
